Nursing encompasses autonomous and collaborative care of individuals of all ages, families, groups and communities, sick or well and in all settings. It includes the promotion of health, the prevention of illness, and the care of ill, disabled and dying people. Nurses play a critical role in health care and are often the unsung heroes in health care facilities and emergency response. They are often the first to detect health emergencies and work on the front lines of disease prevention and the delivery of primary health care, including promotion, prevention, treatment and rehabilitation.

In many countries, nurses make up half of all health care professionals and have a vital role in how health actions are organized and applied, both at the front-line and managerial levels. They are often the first and sometimes only health professional a patient will see and the quality of their initial assessment and subsequent care is vital to strong health outcomes. ENSAA believes that Nurses are playing an important role in delivering Healthcare and making the community healthier.

ENSAA is focusing on assuring that nurses are highly qualified and empowered with updated competencies through providing them needed Knowledge, Skills and attitude. We encourage and prepare nurses to be able to improve nursing, health and community in general.

**ENSAA** Is a registered national NGO approved by Egyptian Ministry of Social Solidarity no 3593, under the registration number of the Central Unit of Associations and Civil Action 22071000200482.
